Vector Calculus

1 Vectors in Euclidean Space 1.1 Introduction In single-variable calculus, the functions that one encounters are functions of a variable (usually x or t) that varies over some subset of the real number line (which we denote by R). For such a function, say, $y=f(x)$, the graph of the function f consists of the points $(x,y)=(x,f(x))$. These points lie in the Euclidean plane, which, in the ...

Calculus This is the free digital calculus text by David R.

Algebra Remember that the common algebraic operations have precedences relative to each other: for example, multiplication and division take precedence over addition and subtraction, but are “tied” with each other. In the case of ties, work left to right. This means, for example, that $1 / 2 \cdot x$ means $(1 / 2) x$: do the division, then the ...
