Governance in the Middle East and North Africa Abbas Kadhim 2013-
02-15 Governance in the Middle East is topic of interest to scholars,
activists and policy makers. The currently proposed book is intended
to present the first comprehensive framework of the question of
governance in the Middle East in its various forms and
manifestations: political, economic, and government performance.
This study will supply the context that is missing in the existing
literature on, perhaps, the last bastion of authoritarianism in the world.
Proposed Contents This book will be structured into two parts: Part I
(Chapters 1-11) provides some theoretical background and analyzes
the patterns and challenges of governance in the Middle East,
providing some global context; Part II (12-Conclusion) will examine
specific cases in selected countries and regions in the Middle East.
Part I: Theory and Context Chapter 1 will be an introduction
describing the main aspects of the book and highlighting the main
points made by the contributors. Chapter 2 will present the theoretical
dimensions of governance and review the "state of the discipline" and
the latest trends in the literature on governance. The author of this
chapter will be an authority in the subject of governance, but does not
have to be necessarily a Middle East scholar. Chapter 3 will examine
the general political trends in the Middle East and provide a historical
background: nation-state formation, colonial and postcolonial
experiences in the Middle East and the nature of the Middle Eastern
political environment at the present time. Chapter 4 will look into the
economic aspects of governance in the Middle East and contextualize
the economic challenges and deficiencies affecting the region.
Chapter 5 will examine the areas of success and failure in
government performance in the region and the aspects of human
development. Chapter 6 will look into the role of religion in shaping
the governance in the Middle East. After all, most Middle Eastern
governments declare Islam as the State religion, while a few consider
Islam the source of governance and legislation (e.g. Saudi Arabia and
Iran). Chapter 7 will shed light on the sectarian division among
Muslims (Shi'a vs. Sunnis) and the significance of this division for the
governance, particularly in countries where the ruling groups belong

to a different sect than the governed, such as Bahrain, Saudi, Kuwait and Lebanon. Chapter 8 will examine relation between the state of governance in the Middle East and the progress of human rights, or lack thereof. The Middle East remains one of the most troubling regions on human rights and the respect for human dignity. All of the region's governments are heavily implicated in very serious violations of the most basic in human rights. Chapter 9 will focus on the status of women in the Middle East and the governmental performance in the region in relevance to women rights and status. The recent years have witnessed many positive changes in this regard, but there remains a lot of work to be done, which is going to be outlined in this chapter. Chapter 10 will look into the role of oil and other natural sources in shaping the economic and political performance of Middle Eastern governments. Also, it will shed light on the various ways these governments distribute the revenues (rents) from these resources and how they use them, or don't, in the development of their countries or, in most cases, on the military and state oppressive machine. Chapter 11 will examine the role of international organizations and trade agreements on the performance of governments and whether or not such factors influence or shape governance in the region. It is well-known that Turkey has changed many of its laws and social policies in response to the demands of EU members and in hopes of being admitted into the EU. The chapter will elaborate on this and similar cases throughout the region. Part II: Case Studies Chapter 12 will examine the case of Iraq. The country is experiencing perhaps the most dramatic scenarios of governance in the region. This chapter will shed light on the unfolding political process and the struggle of Iraqis to forge a path toward democracy in a region determined to resist any political change within its boundaries. Key issues: Power-sharing, pluralism, federalism, ethnic and sectarian conflict, trust-building, corruption and political violence. Chapter 13 will examine the case of Iran. Thirty years after the Islamic Revolution, Iran is entering into a soul-searching phase in its history. The ongoing battle between the reformers and the hardliners is only a sign on the larger problem of governance. A majority of Iranians have no personal recollection of the problems that led to the Revolution. It is vitally important that the government changes its claims to

legitimacy from being the force that toppled the Shah to being the provider of prosperity and development of the country and its young population. Key issues: Political reform, human rights, reconciliation with the West, allocation of resources and services. Chapter 14 will examine the case of Egypt. The country is facing an unknown future with President Mubarak reaching advanced age. The debate over his succession is dividing the country in a dramatic way. Egypt is also a country with depleted infrastructure and an ever-shrinking middle class. If the country falls into a violent cycle after the looming departure of Mubarak, the entire region could fall into the abyss. Key issues: Succession of Mubarak, economic performance, services, religious extremism (Muslim Brotherhood) and Nationalism. Chapter 15 will examine the case of Israel. While politically different from its neighbors, Israel is sinking fast into the same problems that plague the Middle East. The country suffers political corruption and many leadership crises. The government is trying to redefine the identity of the state, which is going to create a showdown with the fast-growing non-Jewish Israeli population, and there is the problem of the government's inability to conclude peace with Israel's neighbors. Key issues: corruption, violence and security. Chapter 16 will examine the case of Saudi Arabia. The country is perhaps the most authoritarian regime in the world. The lack of individual liberties and abuses of human rights are the main problems. The government's treatment of its Shia subjects (approx. 12% of the population) as second-class residents is extremely troubling. The country does not have a meaningful public participation and the Royals who run the government have no accountability to anyone. Key issues: human rights, religious freedom, political reform, public participation. Chapter 17 will examine the case of Bahrain. This small country in the Persian Gulf is facing many challenges. Like Iraq before 2003, it is a country with a clear Shia majority ruled by a small Sunni minority. The Shia are excluded from the government (they were allowed to run for the parliament in the last election for the first time), the military and many other important arenas. The government uses the naturalization of Sunnis as a political tool to change the demographic balance in the country. Key issues: political reform, popular participation, naturalization, human rights. Chapter 18 will examine the case of

Yemen. The current struggle over government performance and fairness toward the South has given rise to the calls for separation of the two parts of Yemen. Also, there is the issue of religious freedom, which cases the ongoing war with the Houthi faction that accuses the government of making alliance with the Saudi government and the Sunni extremists in the country to form an existential threat to Shi'ism. Yemen is also a country with many ungoverned spaces and the governance in the "governed" areas is abysmal. Key issues: political violence, human and religious rights, terrorism, tribalism and poverty. Chapter 19 will examine the case of Turkey and its impressive rise as a model for a strong Muslim nation which tries to reconcile Islam and democracy. Turkey's longstanding problems with social rights, especially of its 12 million Kurds, have always been a formidable challenge to the image of the nation. However, the country's bid to join the EU has forced many changes that inadvertently helped the government's international standing. Chapter 20 will examine the case of Syria and the influence of the Arab nationalist ideology on keeping the country as one of the most oppressive regimes in the region. Also examined will be the affect of Syrian-Israeli conflict on the country's governance. Chapter 21 examines the case of Lebanon. This country which witnessed more governance challenges than any other in the region makes a very interesting case study. The country's sectarian politics and the client-patron relations and loyalties among the various Muslim and Christian elements of society have undermined the country's potential to become a fully democratic state. Chapter 22 will focus on the case of Sudan. This country has been in the center of world attention because of the internal conflict and the accusations of serious violations of human rights and the rise of separatist movements that receive much foreign sympathy and support. The country has missed many opportunities to attain social and political reconciliation, but it should not be considered a lost cause. There is a lot of potential in the country, especially when we consider the vibrant politics of government and opposition. Chapter 23 will examine the case of Jordan and the role of the uniqueness of the regime in creating relative social and political stability. Unlike the most of the governments in the region, the Jordanian Monarchy keeps the government as a convenient buffer between the Royals

and the people. When popular sentiments turn very negative, the King, acting as the good cop, dismisses the government and orders the formation of a new one. Also, Jordan has achieved some good success in absorbing the Islamist groups into the political system, but not without challenges. The chapter will also focus on the Palestinian factor – Palestinians make more than half of the Jordanian population. Chapters 24, 25 & 26 will examine the Maghreb states (Morocco, Algeria and Tunisia). These states face many challenges in their governance: separatism, terrorism and the government oppressive history in Morocco; the Islamism challenge, internal war in the tribal areas and ethnic conflict in Algeria; and the stifling of personal freedom and liberties in Tunisia in the name of secularism and the war on extremism are all challenges that need to be highlighted in a chapter about each country. Chapter 27 will focus on governance in Libya. Having ruled the country for forty-seven years, the Libyan president is the dean of Middle Eastern dictators. He has taken his country through all kinds of political adventures. The rule through popular committees is a unique system that gives Col. Mu'ammad Qadhafi the opportunity to oppress through popular participation and acquiescence. Chapter 28 will focus on the governance in the United Arab Emirates. This confederation of seven emirates has witnessed some excellent success in the economic and infrastructural development, especially in Dubai, which competes with the richest cities in the world, thanks to the energy and vision of its Emir, Muhammad b. Rashid. While it is generally considered much better than its fellow Gulf States, the UAE has its own challenges, especially in light of the absence of unified system of governance, because each emirate has the autonomy to shape its internal affairs. Chapter 29 will examine the governance and, in certain cases, lack thereof in the countries that form the Horn of Africa, i.e. Somalia, Eritrea and Djibouti. These countries face some tremendous challenges in the areas of refugees, resources, stability and ethnic & conflict. The failure of these states, as seen in the case of Somalia, can make the problems of security in the whole region much worse than it is now. Famine and anarchy have already led to wars, piracy and the flood of refugees, not to say much about the humanitarian catastrophes in the region. This chapter will highlight the problems of

governance in these often forgotten countries. Chapter 30 will be a conclusion and final remarks on the general framework of the regional governance and the way forward. This book is aimed at a wide variety of audience. Policy makers, policy analysts, as well as journalists will benefit from the history and analysis that will be presented in the book. Also, academics will find in the book important materials for research and class work. Professors teaching courses on US Foreign policy, Middle East, International Relations, Comparative Politics and many related fields will find the book a very suitable choice for their students to read. Given the media and general public's interest in the Middle East and the Middle East, the book will also appeal to a wide range of educated readers in the United States, the United Kingdom and many other countries world-wide.

Abstract: Evaluation of the privatisation of government agencies in the 21st century Chapter 1 Chapter 1 Introduction 1.1 Introduction In the past two decades, the notion of privatisation to national utilities and agencies has been gaining more and more political momentum. In fact in some countries, it has become "politically correct" to embrace the privatisation policy. The government agencies that we discussed in this paper are those organisations that provide services to the public and are funded by the government budget directly or by government subvention. 1.2 Brief Historical Background After the World War II in 1940s, many countries faced the problem of unemployment, damaged economies and infrastructure which required the state to start the resurrection process. These political and economical problems needed to be dealt with immediately. State provision of services and goods seems to be an inevitable solution. Nationalisation provision to services of goods was the prevailing economic vogue for decades. To depict the situation, there were over 20 percent working force employed by national industries in the United Kingdom during the 1940s. The continuous expansion of the state sector since 1940s can be the result of many reasons. Many infrastructure and social facilities were

destroyed after the War, jobless rate increased. There was an urgent need for the state to rebuild the infrastructure and invest on social welfare to maintain national stability. Other reasons for the continuous expansion of state sector included embracement of Socialist ideology after the War, the persistent increase of demand for more and better public services for the community from the state, the "empire-building" consequences of the bureaucratic system and politicians. -1-

Evaluation of the privatisation of government agencies in the 21st century Chapter 1 With the state sector continued to expand, the inadequacies, and ultimately the failures, surfaced. In the 1980s, besides explaining the increase of state involvement in economic activities, many economists started to focus their attention on explaining the inefficiency of resource allocation by the state, especially when comparing it with the market efficiency of resource allocation. Moreover, with the economical condition improved, the inefficiency of many state-owned companies is criticized openly and people demanded them to reforms. The lack of a profit-motivated management structure resulted in expanding financial losses that could be curtailed through the process of privatisation. The need for improved economic efficiency was further intensified by accelerating globalisation and rapid advanced in technology of communications, transportation, logistics and information management. As the advantages of reduced statism became more and more recognised, the concept of privatisation gained more and more momentum and spread rapidly through the countries of many parts of the world (Europe, Latin America and Asia). Amongst the above places, United Kingdom was pioneer in privatising the national utilities. The 1984 privatisation of British Telecom (BT) by Margaret Thatcher's government could be considered as the origin and primary catalyst for subsequent privatisation efforts around the world. The BT privatisation experience provided a blue print for the denationalisation of large-scale state-owned enterprise. However, people criticised her government for "selling the family si

Nineteen Eighty-Four George Orwell 2021-01-01 George Orwell's

Nineteen Eighty-Four is unquestionably the most famous dystopian novel of all times. Written in the year of 1948, the author swapped the last two digits while describing a future totalitarian society where the minds, attitudes and actions of the subjects are thoroughly scrutinized by the "Thought Police", suspected dissidents tracked down and where the worship of the mythical party leader Big Brother is forced upon the masses. The low-ranking party member Winston Smith begins secretly to question the whole system and initiates a forbidden love affair with another party member.

Government Contracts, 6th Ed Nicholas Seddon 2018-03-07

Government Contracts 6th edition is the new edition of a work that has now been in existence for some twenty-one years. It is Australia's definitive legal text on all levels of government contracting. It focuses on the legal issues that may arise in connection with government contracts and which have no parallel in the private sector. It explains the law in a manner that government contract managers, and their private sector counterparts doing business with government, will find indispensable. Presented in plain English, it is equally accessible to lay readers and lawyers. Law students will also benefit from the up-to-date case law, relevant policy developments and legislation relating to government contracting, including procurement and outsourcing. Authoritative and respected, Government Contracts has been referred to in State and Federal court cases, in the High Court and in government policy documents. New material in this 6th edition includes: a focus on outsourcing human services in Chapter 1 and remedial measures in Chapter 8; analysis at Commonwealth level of the Public Governance, Performance and Accountability Act 2013; a thorough analysis of the Williams cases and their significance for Commonwealth (and possibly State) executive and spending powers; the implications for tender challenges of Australia's application to join the WTO Agreement on Government Procurement, including a Commonwealth Government Procurement (Judicial Review) Bill; the anomalies created in New South Wales and Queensland by legislation that removes corporate status from statutory bodies; further developments on derivative Crown

immunity; case law and commentary on the continuing problem of whether legislation from another polity binds government; developments concerning sovereign risk; the continuing saga of government exemption from the Competition and Consumer Act 2010 and questioning of the position, including in the Harper Review; government contracts transparency requirements in the various jurisdictions. As always with Seddon's work, a careful re-consideration of every aspect of the book has been undertaken providing clarity and comprehensive sources for the reader. This new edition is current to 30 November 2017 and is an indispensable resource for lawyers, government contract managers and their private sector counterparts.

The Far Right Today Cas Mudde 2019-10-25 The far right is back with a vengeance. After several decades at the political margins, far-right politics has again taken center stage. Three of the world's largest democracies – Brazil, India, and the United States – now have a radical right leader, while far-right parties continue to increase their profile and support within Europe. In this timely book, leading global expert on political extremism Cas Mudde provides a concise overview of the fourth wave of postwar far-right politics, exploring its history, ideology, organization, causes, and consequences, as well as the responses available to civil society, party, and state actors to challenge its ideas and influence. What defines this current far-right renaissance, Mudde argues, is its mainstreaming and normalization within the contemporary political landscape. Challenging orthodox thinking on the relationship between conventional and far-right politics, Mudde offers a complex and insightful picture of one of the key political challenges of our time.

Sovereignty Under Challenge John Dickey Montgomery Sovereignty- the authority of a state to wield ultimate power over its territory, its citizens, its institutions-is everywhere undergoing change as states respond in various ways to the challenges posed, from above and below. "Above" the state is the widening net of international institutions and treaties dealing with human rights, trade, investment, and monetary affairs; and "below" it are rising claims within states from long-resident groups discontented with the political order and from new migrants testing its authority. *Sovereignty under Challenge* deals with a range of such challenges and responses, analyzed in authoritative studies by leading scholars. The introductory chapter sets forth the theme that sovereignty is asserted clearly, but often unpredictably, when governments respond to challenge. It suggests ways of classifying these responses as variables that help explain the changing nature of sovereignty. Part 1, "The Citizen and the State," treats the rising tide of dual citizenship and the concerns this arouses in the United States; the work of national human rights commissions in Asia; and the challenge posed to the state by the Falungong movement in China. The two chapters in Part 2, "The Government as Decision-Maker," examine Japan's response to global warming and the problems of the World Health Organization in orchestrating collaboration among Southeast Asian states in implementing infectious disease control. Part 3, "Sovereignty and Culture," looks at conflicts engendered by outside change on indigenous economic, cultural, and legal institutions in India, Fiji, Indonesia, and Malaysia. The chapters in Part 4, "Sovereignty and the Economy," analyze the economic and cultural instability induced by Chinese migration to Russia's far east; the impact on state sovereignty brought about by transnational regulatory campaigns and social activism; the question of indigenous land rights in the Philippines; and the impact of transnational corporations on information technology in Asia. A concluding chapter offers a global assessment of the current status of state sovereignty. John D. The first chapter explores and defines key terms central to understanding how the federal government functions as a purchaser of commercial goods. Chapter 2: Becoming a Government Contractor and Company Readiness prepares the new company for government contracting. In this chapter, you will learn how to register and prepare your company for this new industry. This chapter provides a Company Readiness Questionnaire to guide you through the preparation process. Chapter 3: Contracting Methods and Types provides an exploration of multiple types of contracts used in the purchasing process. With this in mind, Chapter 3 is the longest chapter of the book; it is a necessary tool for new contractors who are unfamiliar with contracts used by the government. Chapter 4: Understanding GSA Schedules introduces the idea of establishing long-range planning goals. The last chapter of this part of the book provides an overview of contract financing. Chapter 5: The Role of Contract Financing ultimately prepares the reader to consider costs associated with developing marketing objectives. Part Two of The James Guide offers insight into the research process. Researching previous awards will help to develop both short-term and long-range marketing objectives. It is important to understand the federal market. Therefore, Chapter 6: Researching the Market helps you to establish research objectives by examining data from multiple free and fee-based outlets. Part Three: Marketing the Company offers practical tips for making your products and services known and available for purchase to the government. Chapter 7: Creating a Marketing Plan is

the last chapter of the book. It provides insight into how to target your products to one or more agencies, how to plan based upon your company's marketing vision, and how to develop a brand of products. The chapter introduces different marketing materials necessary to create a marketing kit. The chapter also offers tips for creating advertising objectives. The last part of the book offers sample worksheets and checklists. The James Guide includes a Sample Marketing Plan created by Gregory James of Federal Contract Intelligence Service. It serves as a culmination of the ideas put forth in this book. Thank you for reading the book.

The book provides an important opportunity for students to learn the core concepts of American Government and understand how those concepts apply to their lives and the world around them. Our American Government textbook

adheres to the scope and sequence of introductory American government courses nationwide. We have endeavored to make the workings of American Government interesting and accessible to students while maintaining the conceptual coverage and rigor inherent in the subject at the college level. With this objective in mind, the content of this textbook has been developed and arranged to provide a logical progression from the fundamental principles of institutional design at the founding, to avenues of political participation, to thorough coverage of the political structures that constitute American government. The book builds upon what students have already learned and emphasizes connections between topics as well as between theory and applications. The goal of each section is to enable students not just to recognize concepts, but to work with them in ways that will be useful in later courses, future careers, and as engaged citizens. The organization and pedagogical features were developed and vetted with feedback from American government instructors dedicated to the project."--BC Campus website.
