The Darker Side of Travel Richard Sharpley 2009

The Darker Side of Travel is a contemporary and comprehensive analysis of dark tourism. Drawing on existing literature, numerous examples and introducing new conceptual perspectives, it develops a theoretically informed foundation for examining the demand for and supply of dark tourism experiences. It also explores issues relevant to the development, management and interpretation of visitor sites and attractions associated with death, disaster and suffering.

Destination Culture Barbara Kirshenblatt-Gimblett

1998-09-05 With the question, "What does it mean to show?", the author explores the agency of display in museums and tourist attractions. She looks at how objects are made to perform their meaning by being collected and how techniques of display, not just the things shown, convey a powerful message.

Touring Cultures Chris Rojek 2002-09-11 It is

becoming ever clearer that while people tour cultures, cultures and objects themselves are in a constant state of migration. This collection brings together some of the most influential writers in the field to examine the complex connections between tourism and cultural change and the relevance of tourist experience to current theoretical debates on space, time and identity.

Native Tours Erve Chambers 2019-06-20 Previous editions of Native Tours provided a much-needed overview and analysis of anthropology's

contributions to tourism as an emerging field of study. Such a cultural perspective illuminated key ideas surrounding worldwide host–guest relations and informed discussions of political and economic influences and the impacts, both negative and positive, of tourism as one of the world's largest industries. Applying a characteristically uncluttered,

authoritative writing style alongside an exceptional command of the relevant literature, Chambers updates, refines, and extends his earlier work. He retains a focus on the social, cultural, economic, and environmental consequences of tourism, and provides a framework for understanding tourism initiatives in their particular circumstances. Three detailed case studies originating in the American Southwest, the Tirolean Alps, and Belize illustrate the varied costs and benefits of tourism.

**Augmented Reality in Tourism, Museums and Heritage** Vladimir Geroimenko 2021 This book provides extensive research into the use of augmented reality in the three interconnected and overlapping fields of the tourism industry, museum exhibitions, and cultural heritage. It is written by a virtual team of 50 leading researchers and practitioners from 16 countries around the world. The authors explore the opportunities and challenges of augmented reality applications, their current status and future trends, informal learning and heritage preservation, mixed reality environments and immersive installations, cultural heritage education and tourism promotion, visitors with special needs, and emerging post-COVID-19 museums and heritage sites. **Augmented Reality in Tourism, Museums and Heritage: A New**

Technology to Inform and Entertain is essential reading not only for researchers, application developers, educators, museum curators, tourism and cultural heritage promoters, but also for students (both graduates and undergraduates) and anyone who is interested in the efficient and practical use of augmented reality technology.

assessment solutions to all the activities in the Learner's Book photocopiable assessment sheets Environment and Tourism Andrew Holden 2000 For many people, holidays are an increasingly central feature of contemporary western society. The tourism industry has expanded rapidly since 1950, but this book poses the significant question of consequent environmental impacts: are environments being benefited or damaged, by the tourist who visit them? A well-balanced introductory text, this topical book on the relationships between tourism, society and the environment, examines 'tourism' and 'environment' in detail, and gives a historical overview of the growth of the tourism industry. It discusses how the tourism industry markets physical and cultural environments to be consumed by the tourist, and the consequences of the tourism they then attract. It explores: \* how the economics of tourism can be adopted in a positive way to aid conservation \* whether the concept of sustainability can be applied to tourism \* provides a critique of the 'new' forms of tourism, that have developed in recent years. An extensive range of international case studies from both the developed and developing world are used to illustrate the theoretical ideas presented, and to aid the student, it includes end of chapter summaries, further

reading guides and boxed vignettes focusing on contemporary environmental issues and debates.

The College Handbook 1988

Overtourism Claudio Milano 2019-06-07 This book examines the evolution of the phenomenon and explores the genesis of overtourism and the system dynamics underlining it. The 'overtourism' phenomenon is defined as the excessive growth of visitors leading to overcrowding and the consequential suffering of residents, due to temporary and often seasonal tourism peaks, that lead to permanent changes in lifestyles, amenities

and well-being. Enormous tensions in overtourism affected destinations have driven the intensification of policy making and scholarly attention toward seeking antidotes to an issue that is considered paradoxical and problematic. Moving beyond the 'top 10 things you can do about overtourism', this book examines the evolution of the phenomenon and explores the genesis of overtourism as well as the system dynamics underpinning it. With a rigorous scientific approach, the book uses systems-thinking and contemporary paradigms around sustainable development, resilience planning and degrowth; while considering global economic, socio-political, environmental discourses. Researchers, analysts, policy makers and industry stakeholders working within tourism as well as those within the private sector, community groups, civil society groups and NGOs will find this book an essential source of information.

Vacation Decision Making Alain Decrop 2006-01-01

The focus of this book is on holiday planning and decision making, which is the cornerstone of tourist

behaviour and tourism marketing. The first three chapters deal with the basics, including an overview of decision-making paradigms and variables (chapter 1), a critical review of existing tourist behaviour models (chapter 2) and a description of the methods that may be used for studying holiday decision making (chapter 3). The chapters that follow relate the findings of an in-depth qualitative and interpretative study that followed the decision making process of 25 Belgian households during a whole year. Chapter 4 discusses the context in which holiday decisions are made. In the next two chapters, the focus is on the decision-making process in itself both at the generic and holiday levels (chapter 5) and at the destination level (chapter 6). Post-experience processes are investigated in chapter 7, whereas group processes are the particular focus of chapter 8. Chapter 9 presents the integrative and conclusive part of the book where a new typology of holidaymakers is proposed. The book has a subject index.

World Social Report 2020 Department of Economic and Social Affairs 2020-02-14 This report examines the links between inequality and other major global trends (or megatrends), with a focus on technological change, climate change, urbanization and international migration. The analysis pays particular attention to poverty and labour market trends, as they mediate the distributional impacts of the major trends selected. It also provides policy recommendations to manage these megatrends in an equitable manner and considers the policy implications, so as to reduce inequalities and support their implementation.

Health and Wellness Tourism Melanie K. Smith

2009 Health and Wellness Tourism takes an innovative look at this rapidly growing sector of today's thriving tourism industry. This book examines the range of motivations that drive this diverse sector of tourists, the products that are being developed to meet their needs and the management implications of these developments. A wide range of international case studies illustrate the multiple aspects of the industry and new and emerging trends including spas, medical wellness, life-coaching, meditation, festivals, pilgrimage and yoga retreats. The authors also evaluate marketing and promotional strategies and assess operational and management issues in the context of health and wellness tourism. This text includes a number of features to reinforce theory for advanced students of hospitality, leisure and tourism and related disciplines.
