An Innocent Abroad J. Hillis Miller 2015-11-30 Since 1988, J. Hillis Miller has traveled to China to lecture on literary theory, especially the role of globalization in literary theory. Over time, he has assisted in the development of distinctively Chinese forms of literary theory, Comparative Literature, and World Literature. The fifteen lectures gathered in *An Innocent Abroad* span both time and geographic location, reflecting his work at universities across China for more than twenty-five years. More important, they reflect the evolution of Miller's thinking and of the lectures' contexts in China as these have markedly changed over the years, especially on either side of Tiananmen Square and in light of China's economic growth and technological change. A foreword by the leading theorist Fredric Jameson provides additional context.

Long Walk to Freedom Nelson Mandela 2008-03-11 The book that inspired the major new motion picture *Mandela: Long Walk to Freedom*. Nelson Mandela is one of the great moral and political leaders of our time: an international hero whose lifelong dedication to the fight against racial oppression in South Africa won him the Nobel Peace Prize and the presidency of his country. Since his triumphant release in 1990 from more than a quarter-century of imprisonment, Mandela has been at the center of the most compelling and inspiring political drama in the world. As president of the African National Congress and head of South Africa's anti-apartheid movement, he was instrumental in moving the nation toward multiracial government and majority rule. He is revered everywhere as a vital force in the fight for human rights and racial equality. *LONG WALK TO FREEDOM* is his moving and exhilarating autobiography, destined to take its place among the finest memoirs of history's greatest figures. Here for the first time, Nelson Rolihlahla Mandela tells the extraordinary story of his life—an epic of struggle, setback, renewed hope, and ultimate triumph.

Chronicles of Wasted Time Malcolm Muggeridge 2006 Back in print for the first time since Muggeridge's death in 1990, both published volumes of his acclaimed biography—*The Green Stick* and *The Infernal Grove*, plus the previously unpublished start to an unfinished third volume entitled *The Right Eye*—all brought together in one unabridged volume. "There is not a flat page in this mingling of anecdote, comment and self-criticism. . . . An international throng of writers, politicians, soldiers, spies, traitors and eccentrics jostles in these page from Attlee to Wodehouse via Burgess and Philby, Churchill, de Gaulle, Gide, Chanel, Montgomery, Evelyn Waugh." -*The Daily Telegraph* "Much of it . . . is very funny indeed; his description of being inducted into the mysteries of invisible writing when he joined the M16, for instance, is one of the great comic set-pieces that are artfully placed throughout the book. . . . Apart from these, the wit sparkles on almost every page." -*The Observer* ". . . this is one of the most delightful and entertaining memoirs of our age." -*The Washington Post* "A sure hand pushes the pen; a splendid mind guides the hand. There are paragraphs in this book that . . . are models of the best of clarity, grace and beauty in the English language." -*The Dallas Morning News* Born in 1903, Malcolm Muggeridge started his career as a university lecturer in Cairo before taking up journalism. As a journalist he worked around the world on the *Guardian*, *Calcutta Statesman*, the *Evening Standard* and the *Daily Telegraph*. In 1953 became editor of *Punch*, where he remained for four years. In later years he became best known as a broadcaster both on television and radio for the BBC. His other books include *Jesus Rediscovered*, *Christ and the Media*, and *A Third Testament*.

Focus Mike Schmoker 2018-07-16 In this 2nd edition of *Focus: Elevating the Essentials to Radically Improve Student Learning*, Mike Schmoker extends and updates the case that our schools could be on the cusp of swift, unparalleled improvements. But we are stymied by a systemwide failure to simplify and prioritize; we have yet to focus our limited time and energy on the most essential, widely acknowledged, evidence-based practices that could have more impact than all other initiatives combined. They are: simple, coherent curricula; straightforward, traditional literacy practices; and lessons built around just a few hugely effective elements of good teaching. As Schmoker demonstrates, the case for these practices—and the need for them—has grown prodigiously. In every chapter, you'll find late-breaking discoveries and practical advice on how to simplify the implementation of new state standards in the subject areas; on the hidden pitfalls of our most popular, but unproven instructional fads and programs; and on simple, versatile strategies for building curriculum, planning lessons, and integrating literacy into every discipline. All of these strategies and findings are supported with exciting new evidence from actual schools. Their success confirms, as Michael Fullan writes, that a focus on the best "high-leverage practices" won't only improve student performance; they will produce "stunningly powerful consequences" in our schools.

Cherokee Women Theda Perdue 1998-01-01 Theda Perdue examines the roles and responsibilities of Cherokee women during the eighteenth and nineteenth centuries, a time of intense cultural change. While building on the research of earlier historians, she develops a uniquely complex view of the effects of contact on Native gender relations, arguing that Cherokee conceptions of gender persisted long after contact. Maintaining traditional gender roles actually allowed Cherokee women and men to adapt to new circumstances and adopt new industries and practices.

The Cambridge History of America and the World: Volume 4, 1945 to the Present David C. Engerman 2021-11-30 The fourth volume of *The Cambridge History of America and the World* examines the heights of American global power in the mid-twentieth century and how challenges from at home and abroad altered the United States and its role in the world. The second half of the twentieth century marked the pinnacle of American global power in economic, political, and cultural terms, but even as it reached such heights, the United States quickly faced new challenges to its power, originating both domestically and internationally. Highlighting cutting-edge ideas from scholars from all over the world, this volume anatomizes American power as well as the counters and alternatives to 'the American empire.' Topics include US economic and military power, American culture overseas, human rights and humanitarianism, third-world internationalism, immigration, communications technology, and the Anthropocene.

The Writing Public Elizabeth Andrews Bond 2021-03-15 Inspired by the reading and writing habits of citizens leading up to the French Revolution, *The Writing Public* is a compelling addition to the long-running debate about the link between the Enlightenment and the political struggle that followed.

Elizabeth Andrews Bond scoured France's local newspapers spanning the two decades prior to the Revolution as well as its first three years, shining a light on the letters to the editor. A form of early social media, these letters constituted a lively and ongoing conversation among readers. Bond takes us beyond the glamorous salons of the intelligentsia into the everyday worlds of the craftsmen, clergy, farmers, and women who composed these letters. As a result, we get a fascinating glimpse into who participated in public discourse, what they most wanted to discuss, and how they shaped a climate of opinion. *The Writing Public* offers a novel examination of how French citizens used the information press to form norms of civic discourse and shape the experience of revolution. The result is a nuanced analysis of knowledge production during the Enlightenment. Thanks to generous funding from Michigan State University and its participation in TOME (Toward an Open Monograph Ecosystem), the ebook editions of this book are available as Open Access (OA) volumes, available on the Cornell University Press website and other Open Access repositories.

Ship of Fools Tucker Carlson 2019-10-01 The #1 New York Times bestseller from FOX News star of Tucker Carlson Tonight offers "a targeted snipe at the Democrats and Republicans and their elite enablers" (*New York Journal of Books*) in a funny political commentary on how America's ruling class has failed everyday Americans. "Informal and often humorous...an entertainingly told narrative of elite malfeasance" (*Publishers Weekly*), Tucker Carlson's *Ship of Fools* tells the truth about the new American elites, a group whose power and wealth has grown beyond imagination even as the rest of the country has

withered. The people who run America now barely interact with it. They fly on their own planes, ski on their own mountains, watch sporting events far from the stands in sky boxes. They have total contempt for you. In *Ship of Fools*, Tucker Carlson offers a blistering critique of our new overlords and answers the all-important question: How do we put the country back on course? Traditional liberals are gone, he writes. The patchouli-scented hand-wringers who worried about whales and defended free speech have been replaced by globalists who hide their hard-edged economic agenda behind the smokescreen of identity politics. They'll outsource your job while lecturing you about transgender bathrooms. Left and right, Carlson says, are no longer meaningful categories in America. "The rift is between those who benefit from the status quo, and those who don't." Our leaders are fools, Carlson concludes, "unaware that they are captains of a sinking ship." But in the signature and witty style that viewers of Tucker Carlson Tonight enjoy so much, *Ship of Fools* is "bulging with big and interesting ideas, presented succinctly with wit and precision, each chapter a potential book in itself" (*The Washington Times*).

Key Concepts in Public Archaeology Gabriel Moshenska 2017-09-28 This book provides a broad overview of the key concepts in public archaeology, a research field that examines the relationship between archaeology and the public, in both theoretical and practical terms. While based on the long-standing programme of undergraduate and graduate teaching in public archaeology at UCL's renowned Institute of Archaeology, the book also takes into account the growth of scholarship from around the world and seeks to clarify what exactly 'public archaeology' is by promoting an inclusive, socially and politically engaged vision of the discipline. Written for students and practitioners, the individual chapters provide textbook-level introductions to the themes, theories and controversies that connect archaeology to wider society, from the trade in illicit antiquities to the use of digital media in public engagement, and point readers to the most relevant case studies and learning resources to aid their further study. This book was produced as part of JISC's Institution as e-Textbook Publisher project. Find out more at <https://www.jisc.ac.uk/rd/projects/institution-as-e-textbook-publisher> Praise for *Key Concepts in Archaeology* 'Littered throughout with concise and well-chosen case studies, *Key Concepts in Public Archaeology* could become essential reading for undergraduates and is a welcome reminder of where archaeology sits in UK society today.' *British Archaeology*

Autistic Community and the Neurodiversity Movement Steven K. Kapp 2019-11-07 This open access book marks the first historical overview of the autism rights branch of the neurodiversity movement, describing the activities and rationales of key leaders in their own words since it organized into a unique community in 1992. Sandwiched by editorial chapters that include critical analysis, the book contains 19 chapters by 21 authors about the forming of the autistic community and neurodiversity movement, progress in their influence on the broader autism community and field, and their possible threshold of the advocacy establishment. The actions covered are legendary in the autistic community, including manifestos such as "Don't Mourn for Us", mailing lists, websites or webpages, conferences, issue campaigns, academic project and journal, a book, and advisory roles. These actions have shifted the landscape toward viewing autism in social terms of human rights and identity to accept, rather than as a medical collection of deficits and symptoms to cure.

The Discipline of Religion Russell T. McCutcheon 2003-12-08 *The Discipline of Religion* is a lively critical journey through religious studies today, looking at its recent growth as an academic discipline, and its contemporary political and social meanings. Focusing on the differences between religious belief and academic religious discourse, Russell T. McCutcheon argues that the invention of religion as a discipline blurs the distinction between criticism and doctrine in its assertion of the relevance of faith as a credible object of study. In the leap from disciplinary criticism to avowal of actual cosmic and moral meaning, schools of religious studies extend their powers far beyond universities and into the everyday lives of those outside, managing and curtailing specific types of speech and dissent.

Stories of Open: Emily Ford 2021-07-02 Peer review processes in scholarly publishing are often hidden behind layers of opacity, leaving authors--and even reviewers--with many questions about the process. Open peer review is one way to improve the practice. It can shorten the time between manuscript submission and publication, hold reviewers accountable for their work, make more apparent the hidden labor of reviewing and editing, allow for collaborative discourse between authors and reviewers, and more. Even with these benefits, open peer review is not widely accepted or understood. Few academic librarians have experienced it, and each implementation can be different; anything open is highly nuanced and contextual. Ultimately, when we discuss "open," we must discuss the stories around it. What is the aim? What are the pitfalls? What are the gains? And are we trying to simply replicate a broken system instead of reinventing it? *Stories of Open: Opening Peer Review through Narrative Inquiry* examines the methods and processes of peer review, as well as the stories of those who have been through it. Eleven chapters are divided into three parts: * Part 1: Orientation. This section offers a conceptual frame for the book, providing details about narrative inquiry as a methodology and the author's worldview and research approach. * Part 2: The Stories (The Story Middle). What is the standard experience of peer review in our field? This section shares stories told from a variety of viewpoints and roles--author, editor, and referee--and explores how these roles interact, the tension between them, and the duality and sometimes multiplicity of roles experienced by any one individual. * Part 3: Coda. These four chapters tie the stories to the idea of open and look in detail at the research method, as well as imagine how we might move forward--reflecting on our past stories to create future ones. When we open ourselves to others' experiences, we reflect on our own. *Stories of Open* offers questions for reflection at the end of many chapters in order to assist in the continued exploration of your own experiences with peer review, and encourages the use of these reflections in creating new and improved peer review methods. This book is also available as an open access edition at <https://bit.ly/ACRLStoriesofOpen>

Culture and Imperialism Edward W. Said 2012-10-24 A landmark work from the author of *Orientalism* that explores the long-overlooked connections between the Western imperial endeavor and the culture that both reflected and reinforced it. In the nineteenth and early twentieth centuries, as the Western powers built empires that stretched from Australia to the West Indies, Western artists created masterpieces ranging from *Mansfield Park* to *Heart of Darkness* and *Aida*. Yet most cultural critics continue to see these phenomena as separate. Edward Said looks at these works alongside those of such writers as W. B. Yeats, Chinua Achebe, and Salman Rushdie to show how subject peoples produced their own vigorous cultures of opposition and resistance. Vast in scope and stunning in its erudition, *Culture and Imperialism* reopens the dialogue between literature and the life of its time.

What Works in Girls' Education Gene B Sperling 2015-09-29 Hard-headed evidence on why the returns from investing in girls are so high that no nation or family can afford not to educate their girls. Gene Sperling, author of the seminal 2004 report published by the Council on Foreign Relations, and Rebecca Winthrop, director of the Center for Universal Education, have written this definitive book on the importance of girls' education. As Malala Yousafzai expresses in her foreword, the idea that any child could be denied an education due to poverty, custom, the law, or terrorist threats is just wrong and unimaginable. More than 1,000 studies have provided evidence that high-quality girls' education around the world leads to wide-ranging returns: Better outcomes in economic areas of growth and incomes Reduced rates of infant and maternal mortality Reduced rates of child marriage Reduced rates of the incidence of HIV/AIDS and malaria Increased agricultural productivity Increased resilience to natural disasters Women's empowerment *What Works in Girls' Education* is a compelling work for both concerned global citizens, and any academic, expert, nongovernmental organization (NGO) staff member, policymaker, or journalist seeking to dive into the evidence and policies on girls' education.

Pioneers In Microbiology: The Human Side Of Science Chung King-thom 2017-08-23 Pasteurization, penicillin, Koch's postulates, and gene coding. These discoveries and inventions are vital yet commonplace in modern life, but were radical when first introduced to the public and academia. In this book, the life and times of leading pioneers in microbiology are discussed in vivid detail, focusing on the background of each discovery and the process in which they were developed — sometimes by accident or sheer providence.

Mirrors Eduardo Galeano 2009-05-26 Throughout his career, Eduardo Galeano has turned our understanding of history and reality on its head. Isabelle Allende said his works "invade the reader's mind, to persuade him or her to surrender to the charm of his writing and power of his idealism." *Mirrors*, Galeano's most ambitious project since *Memory of Fire*, is an unofficial history of the world seen through history's unseen, unheard, and forgotten. As Galeano notes: "Official history has it that Vasco Núñez de Balboa was the first man to see, from a summit in Panama, the two oceans at once. Were the people who lived there blind???" Recalling the lives of artists, writers, gods, and visionaries, from the Garden of Eden to twenty-first-century New York, of the black slaves who built the White House and the women erased by men's fears, and told in hundreds of kaleidoscopic vignettes, *Mirrors* is a magic

mosaic of our humanity.

A Patriot's History of the United States Larry Schweikart 2004-12-29 For the past three decades, many history professors have allowed their biases to distort the way America's past is taught. These intellectuals have searched for instances of racism, sexism, and bigotry in our history while downplaying the greatness of America's patriots and the achievements of "dead white men." As a result, more emphasis is placed on Harriet Tubman than on George Washington; more about the internment of Japanese Americans during World War II than about D-Day or Iwo Jima; more on the dangers we faced from Joseph McCarthy than those we faced from Josef Stalin. A Patriot's History of the United States corrects those doctrinaire biases. In this groundbreaking book, America's discovery, founding, and development are reexamined with an appreciation for the elements of public virtue, personal liberty, and private property that make this nation uniquely successful. This book offers a long-overdue acknowledgment of America's true and proud history.

Ecological Literature and the Critique of Anthropocentrism Bryan L. Moore 2017-10-14 This book is an analysis of literary texts that question, critique, or subvert anthropocentrism, the notion that the universe and everything in it exists for humans. Bryan Moore examines ancient Greek and Roman texts; medieval to twentieth-century European texts; eighteenth-century French philosophy; early to contemporary American texts and poetry; and science fiction to demonstrate a historical basis for the questioning of anthropocentrism and contemplation of responsible environmental stewardship in the twenty-first century and beyond. Ecological Literature and the Critique of Anthropocentrism is essential reading for ecocritics and ecofeminists. It will also be useful for researchers interested in the relationship between science and literature, environmental philosophy, and literature in general.

This Civilisation is Finished Rupert Read 2019-03-31 Industrial civilisation has no future. It requires limitless economic growth on a finite planet. The reckless combustion of fossil fuels means that Earth's climate is changing disastrously, in ways that cannot be resolved by piecemeal reform or technological innovation. Sooner rather than later this global capitalist system will come to an end, destroyed by its own ecological contradictions. Unless humanity does something beautiful and unprecedented, the ending of industrial civilisation will take the form of collapse, which could mean a harrowing die-off of billions of people. This book is for those ready to accept the full gravity of the human predicament - and to consider what in the world is to be done. How can humanity mindfully navigate the inevitable descent ahead? Two critical thinkers here remove the rose-tinted glasses of much social and environmental commentary. With unremitting realism and yet defiant positivity, they engage each other in uncomfortable conversations about the end of Empire and what lies beyond.

Is That a Fish in Your Ear? David Bellos 2011-10-11 A New York Times Notable Book for 2011 One of The Economist's 2011 Books of the Year People speak different languages, and always have. The Ancient Greeks took no notice of anything unless it was said in Greek; the Romans made everyone speak Latin; and in India, people learned their neighbors' languages—as did many ordinary Europeans in times past (Christopher Columbus knew Italian, Portuguese, and Castilian Spanish as well as the classical languages). But today, we all use translation to cope with the diversity of languages. Without translation there would be no world news, not much of a reading list in any subject at college, no repair manuals for cars or planes; we wouldn't even be able to put together flat-pack furniture. **Is That a Fish in Your Ear?** ranges across the whole of human experience, from foreign films to philosophy, to show why translation is at the heart of what we do and who we are. Among many other things, David Bellos asks: What's the difference between translating unprepared natural speech and translating Madame Bovary? How do you translate a joke? What's the difference between a native tongue and a learned one? Can you translate between any pair of languages, or only between some? What really goes on when world leaders speak at the UN? Can machines ever replace human translators, and if not, why? But the biggest question Bellos asks is this: How do we ever really know that we've understood what anybody else says—in our own language or in another? Surprising, witty, and written with great joie de vivre, this book is all about how we comprehend other people and shows us how, ultimately, translation is another name for the human condition.
