Human Trafficking Louise Shelley 2010-07-29 This book examines all forms of human trafficking globally, revealing the operations of the trafficking business and the nature of the traffickers themselves. Using a historical and comparative perspective, it demonstrates that there is more than one business model of human trafficking and that there are enormous variations in human trafficking in different regions of the world. Drawing on a wide body of academic research - actual prosecuted cases, diverse reports and field work and interviews conducted by the author over the last sixteen years in Asia, Latin America, Africa, Europe and the former socialist countries - Louise Shelley concludes that human trafficking will grow in the twenty-first century as a result of economic and demographic inequalities in the world, the rise of conflicts and possibly global climate change. Coordinated efforts of government, civil society, the business community, multilateral organizations and the media are needed to stem its growth.

Economic Gangsters Ray Fisman 2010-01-04 Meet the economic gangster. He's the United Nations diplomat who double-parks his Mercedes on New York City streets at rush hour because the cops can't touch him--he has diplomatic immunity. He's the Chinese smuggler who dodges tariffs by magically transforming frozen chickens into frozen turkeys. The dictator, the warlord, the unscrupulous bureaucrat who bilks the developing world of billions in aid. The calculating crook who views stealing and murder as just another part of his business strategy. And, in the wrong set of circumstances, he might just be you. In Economic Gangsters, Raymond Fisman and Edward Miguel take readers into the secretive, chaotic, and brutal worlds inhabited by these lawless and violent thugs. Join these two sleuthing economists as they follow the foreign aid money trail into the grasping hands of corrupt governments and shady underworld characters. Spend time with ingenious black marketeers as they game the international system. Follow the steep rise and fall of stock prices of companies with unseemly connections to Indonesia's former dictator. See for yourself what rainfall has to do with witch killings in Tanzania--and more. Fisman and Miguel use economics to get inside the heads of these "gangsters," and propose solutions that can make a difference to the world's poor--including cash infusions to defuse violence in times of drought, and steering the World Bank away from aid programs most susceptible to corruption. In a new postscript, the authors look at how economists might use new tools to better understand, and fight back against, corruption and violence in the aftermath of the 2008 financial crisis. Take an entertaining walk on the dark side of global economic development with Economic Gangsters.

When Helping Hurts Steve Corbett 2014-01-24 With more than 300,000 copies in print, When Helping Hurts is a paradigm-forming contemporary classic on the subject of poverty alleviation. Poverty is much more than simply a lack of material resources, and it takes much more than donations and handouts to solve it. When Helping Hurts shows how some alleviation efforts, failing to consider the complexities of poverty, have actually (and unintentionally) done more harm than good. But it looks ahead. It encourages us to see the dignity in everyone, to empower the materially poor, and to know that we are all uniquely needy—and that God in the gospel is reconciling all things to himself. Focusing on both North American and Majority World contexts, When Helping Hurts provides proven strategies for effective poverty alleviation, catalyzing the idea that sustainable change comes not from the outside in, but from the inside out.

Terrify No More Gary Haugen 2010-06-14 "If you're tired of living an anemic life and you want to live courageously, get this book. Terrify No More is a suspenseful read that will introduce you to the new heroes of the faith—people who are willing to take risks to bring hope and freedom to those who need it most." — Rick Warren, Author, The Purpose Driven Life Senior Pastor, Saddleback Church "...Producer Richard Greenberg showed me some truly alarming videotape he'd obtained from a human rights group called the International Justice Mission... That tape would trigger one of the most extensive international searches I'd ever been involved with as a Dateline Correspondent." —Chris Hansen, NBC News Correspondent "Now we have a gripping, close-up account of how IJM carries out its mission in Cambodia. Gary Haugen's book should awaken many to what goes on in the 21st century slave trade." — Ambassador John R. Miller, Director, Office to Monitor and Combat Trafficking in Persons Out of shocking depravity emerges a story of hope. In a small village outside Phnom Penh, children as young as five are bought and sold as sex slaves. Day after day their abuse continues, and their hope slips away. In Terrify No More an international team of investigators goes undercover to infiltrate this ring of brothels and gather evidence needed to free these girls. Meanwhile, skilled legal minds race the clock, working at the highest levels of U.S. and foreign governments to bring the perpetrators to justice. Headed up by former U.N. war-crimes investigator, Gary Haugen, the team perseveres against impossible obstacles—police corruption, death

threats, and mission-thwarting tip-offs—in a mission focused on bringing freedom to the victims.

The Global Food Crisis Jennifer Clapp 2009-09-30 The global food crisis is a stark reminder of the fragility of the global food system. *The Global Food Crisis: Governance Challenges and Opportunities* captures the debate about how to go forward and examines the implications of the crisis for food security in the world's poorest countries, both for the global environment and for the global rules and institutions that govern food and agriculture. In this volume, policy-makers and scholars assess the causes and consequences of the most recent food price volatility and examine the associated governance challenges and opportunities, including short-term emergency responses, the ecological dimensions of the crisis, and the longer-term goal of building sustainable global food systems. The recommendations include vastly increasing public investment in small-farm agriculture; reforming global food aid and food research institutions; establishing fairer international agricultural trade rules; promoting sustainable agricultural methods; placing agriculture higher on the post-Kyoto climate change agenda; revamping biofuel policies; and enhancing international agricultural policy-making. Co-published with the Centre for International Governance Innovation

Global Economic Prospects, June 2020 World Bank Group 2020-07-07 The COVID-19 pandemic has, with alarming speed, dealt a heavy blow to an already-weak global economy, which is expected to slide into its deepest recession since the second world war, despite unprecedented policy support. The global recession would be deeper if countries take longer to bring the pandemic under control, if financial stress triggers defaults, or if there are protracted effects on households and firms. Economic disruptions are likely to be more severe and protracted in emerging market and developing economies with larger domestic outbreaks and weaker medical care systems; greater exposure to international spillovers through trade, tourism, and commodity and financial markets; weaker macroeconomic frameworks; and more pervasive informality and poverty. Beyond the current steep economic contraction, the pandemic is likely to leave lasting scars on the global economy by undermining consumer and investor confidence, human capital, and global value chains. Being mostly a reflection of the recent plunge in global energy demand, low oil prices are unlikely to provide much of a boost to global growth in the near term. While policymakers' immediate priorities are to address the health crisis and moderate the short-term economic losses, the likely long-term consequences of the pandemic highlight the need to forcefully undertake comprehensive reform programs to improve the fundamental drivers of economic growth, once the crisis abates. *Global Economic Prospects* is a World Bank Group Flagship Report that examines global economic developments and prospects, with a special focus on emerging market and developing economies, on a semiannual basis (in January and June). The January edition includes in-depth analyses of topical policy challenges faced by these economies, while the June edition contains shorter analytical pieces.

Rural Poverty, Risk and Development Marcel Fafchamps 1999 All men and women are subject to risk: illness, accident, death. Some shocks affect their ability to feed and support themselves properly, either temporarily: unemployment, crop failure, and loss of property; or permanently: disability, and skill obsolescence. This report summarises what is known and also what is not known about the sources of risk faced by the rural poor and their coping strategies. It examines the impact of risk and risk-coping strategies on development and the way in which governments and international organisations can assist in dealing with risk and overcoming poverty.

The impact of disasters and crises on agriculture and food security: 2021 Food and Agriculture Organization of the United Nations 2021-03-17 On top of a decade of exacerbated disaster loss, exceptional global heat, retreating ice and rising sea levels, humanity and our food security face a range of new and unprecedented hazards, such as megafires, extreme weather events, desert locust swarms of magnitudes previously unseen, and the COVID-19 pandemic. Agriculture underpins the livelihoods of over 2.5 billion people – most of them in low-income developing countries – and remains a key driver of development. At no other point in history has agriculture been faced with such an array of familiar and unfamiliar risks, interacting in a hyperconnected world and a precipitously changing landscape. And agriculture continues to absorb a disproportionate share of the damage and loss wrought by disasters. Their growing frequency and intensity, along with the systemic nature of risk, are upending people's lives, devastating livelihoods, and jeopardizing our entire food system. This report makes a powerful case for investing in resilience and disaster risk reduction – especially data gathering and analysis for evidence informed action – to ensure agriculture's crucial role in achieving the future we want.

Serving God Globally Roland Hoksbergen 2012-06-01 Dominating the daily news cycle today are the grim realities of grinding poverty, sex trafficking, gender discrimination, child soldiering, HIV/AIDS, failed states, corruption, and environmental breakdown. In the midst of such pain and brokenness, the followers of Christ cannot stand idly by, for God calls them into the mission of reconciling all things, first by easing suffering and then by building flourishing communities through the process of transformational human development. This practical handbook explains what development is, what development workers actually do, and how young people can prepare for mission careers in this field, both in North America and abroad. In addition to setting the big picture for how Christians approach the big questions of international

development, the book draws on stories, advice, and wisdom collected from personal interviews with about fifty development professionals.

Good News About Injustice Gary A. Haugen 2009-09-20 A year 2000 Finalist in the ECPA book competition! Accounts of injustice from our own communities and from around the world often leave us feeling outraged and helpless. We wonder what we can possibly do in response. And we wonder where is the God of justice? Jesus, however, said, "Take heart! I have overcome the world." Gary Haugen sees the truth of Jesus' claim vindicated throughout Scripture, which portrays a God who rises up against injustice. He also sees this truth in the lives of sometimes little-known Christians who through the years have courageously confronted evil when they saw it. Here he tells stories of these witnesses of hope in a hurting world. The good news about injustice is that God is against it. God is in the business of using the unlikely to perform the holy, Haugen contends. And in this book he not only offers stories of courageous witnesses past and present, he also calls the body of Christ to action. He offers concrete guidance on the ways and means its members can rise up to seek justice throughout the world.

IMF staff highlights the importance of increasing public revenue mobilization and strengthening expenditure management and efficiency, and securing financing in the form of grants, which would create space for an increase in pro-poor spending. Deepening Community Paul Born 2014-03-10 Community shapes our identity, quenches our thirst for belonging, and bolsters our physical, mental, emotional, and economic health. But in the chaos of modern life, community ties have become unraveled, leaving many feeling afraid or alone in the crowd, grasping at shallow substitutes for true community. In this thoughtful and moving book, Paul Born describes the four pillars of deep community: sharing our stories, taking the time to enjoy one another, taking care of one another, and working together for a better world. To show the role each of these plays, he shares his own stories—as a child of refugees and as a longtime community activist. It's up to us to create community. Born shows that the opportunity is right in front of us if we have the courage and conviction to pursue it.

Edible Insects Arnold van Huis 2013 Edible insects have always been a part of human diets, but in some societies there remains a degree of disdain and disgust for their consumption. Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production, diversify diets, and support livelihoods in both developing and developed countries. Edible insects are a promising alternative to the conventional production of meat, either for direct human consumption or for indirect use as feedstock. This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.

Letters from the Dust Bowl Caroline Henderson 2012-10-19 In May 1936 Secretary of Agriculture Henry A. Wallace wrote to Caroline Henderson to praise her contributions to American "understanding of some of our farm problems." His comments reflected the national attention aroused by Henderson's articles, which had been published in *Atlantic Monthly* since 1931. Even today, Henderson's articles are frequently cited for her vivid descriptions of the dust storms that ravaged the Plains. Caroline Henderson was a Mount Holyoke graduate who moved to Oklahoma's panhandle to homestead and teach in 1907. This collection of Henderson's letters and articles published from 1908 to 1966 presents an intimate portrait of a woman's life in the Great Plains. Her writing mirrors her love of the land and the literature that sustained her as she struggled for survival. Alvin O. Turner has collected and edited Henderson's published materials together with her private correspondence. Accompanying biographical sketch, chapter introductions, and annotations provide details on Henderson's life and context for her frequent literary allusions and comments on contemporary issues.

Year of the Locust Salim Tamari 2015-08-18 Year of the Locust captures in page-turning detail the end of the Ottoman world and a pivotal moment in Palestinian history. In the diaries of Ihsan Hasan al-Turjman (1893–1917), the first ordinary recruit to describe World War I from the Arab side, we follow the misadventures of an Ottoman soldier stationed in Jerusalem. There he occupied himself by dreaming about his future and using family connections to avoid being sent to the Suez. His diaries draw a unique picture of daily life in the besieged city, bringing into sharp focus its communitarian alleys and obliterated neighborhoods, the ongoing political debates, and, most vividly, the voices from its streets—soldiers, peddlers, prostitutes, and vagabonds. Salim Tamari's indispensable introduction places the diary in its local, regional, and imperial contexts while deftly revising conventional wisdom on the disintegration of the Ottoman Empire.

When Should Law Forgive? Martha Minow 2019-09-24 "Martha Minow is a voice of moral clarity: a lawyer arguing for forgiveness, a scholar arguing for evidence, a person arguing for compassion." —Jill Lepore, author of *These Truths* In an age increasingly defined by accusation and resentment, Martha Minow makes an eloquent, deeply-researched argument in favor of strengthening the role of forgiveness in the administration of law. Through three case studies, Minow addresses such foundational issues as: Who has the right to forgive? Who should be forgiven? And under what terms? The result is as lucid as it is compassionate: A compelling study of the mechanisms of justice by one of this country's foremost legal experts.

Moving Out of Poverty Deepa Narayan 2009-12-09 There is no peace with hunger. Only promises and promises and no fulfillment. If there is no job, there is no peace. If there is nothing to cook in the pot, there is no peace. - Oscar, a 57-year-old man, El Gorri n, Colombia They want to construct their houses near the road, and they cannot do that if they do not have peace with their enemies. So peace and the road have developed a symbiotic relation. One cannot live without the other. . . . - A community leader from a conflict-affected community on the island of Mindanao, Philippines Most conflict studies focus on the national level, but this volume focuses on the community level. It explores how communities experience and recover from violent conflict, and the surprising opportunities that can emerge for poor people to move out of poverty in these harsh contexts. 'Rising from the Ashes of Conflict' reveals how poor people s mobility is shaped by local democracy, people s associations, aid strategies, and the local economic environment in over 100 communities in seven conflict-affected countries, including Afghanistan. The findings suggest the need to rethink postconflict development assistance. This is the fourth volume in a series derived from the Moving Out of Poverty study, which explores mobility from the perspectives of poor people in more than 500 communities across 15 countries.

Locust Jeffrey A. Lockwood 2009-04-28 Throughout the nineteenth century, swarms of locusts regularly swept across the continent, turning noon into dusk, demolishing farm communities, and bringing trains to a halt as the crushed bodies of insects greased the rails. In 1876, the U.S. Congress declared the locust "the single greatest impediment to the settlement of the country." From the Dakotas to Texas, from California to Iowa, the swarms pushed thousands of settlers to the brink of starvation, prompting the federal government to enlist some of the greatest scientific minds of the day and thereby jumpstarting the fledgling science of entomology. Over the next few decades, the Rocky Mountain locust suddenly -- and mysteriously -- vanished. A century later, Jeffrey Lockwood set out to discover why. Unconvinced by the reigning theories, he searched for new evidence in musty books, crumbling maps, and crevassed glaciers, eventually piecing together the elusive answer: A group of early settlers unwittingly destroyed the locust's sanctuaries just as the insect was experiencing a natural population crash. Drawing on historical accounts and modern science, Locust brings to life the cultural, economic, and political forces at work in America in the late-nineteenth century, even as it solves one of the greatest ecological mysteries of our time.

Public Policy Sara R. Rinfret 2018-06-21 Public Policy: A Concise Introduction, by Sara R. Rinfret, Denise Scheberle, and Michelle C. Pautz, is a student-friendly primer that quickly connects readers to the inner workings of public policy. The text condenses early chapters on theory and the policy-making process, allowing students to take up key policy challenges—such as immigration, education, and health care—much earlier in the semester. Structured chapter layouts of substantive policy areas allow instructors to supplement with their own examples seamlessly. The book's emphasis on policy choices asks students to look beyond simple pros and cons to examine the multifaceted dimensions of decision making and the complexities inherent in real-world problem solving. Not every student starts out engaged in public policy, so place your students—both majors and non-majors alike—in the driver's seat by fostering their analytical skills early, and spend the rest of the semester discussing policy issues, examining data, and debating current policy examples that matter most to them.

The State of Food Security and Nutrition in the World 2021 Food and Agriculture Organization of the United Nations 2021-07-12 In recent years, several major drivers have put the world off track to ending world hunger and malnutrition in all its forms by 2030. The challenges have grown with the COVID-19 pandemic and related containment measures. This report presents the first global assessment of food insecurity and malnutrition for 2020 and offers some indication of what hunger might look like by 2030 in a scenario further complicated by the enduring effects of the COVID-19 pandemic. It also includes new estimates of the cost and affordability of healthy diets, which provide an important link between the food security and nutrition indicators and the analysis of their trends. Altogether, the report highlights the need for a deeper reflection on how to better address the global food security and nutrition situation. To understand how hunger and malnutrition have reached these critical levels, this report draws on the analyses of the past four editions, which have produced a vast, evidence-based body of knowledge of the major drivers behind the recent changes in food security and nutrition. These drivers, which are increasing in frequency and intensity, include conflicts, climate variability and extremes, and economic slowdowns and downturns – all exacerbated by the underlying causes of poverty and very high and persistent levels of inequality. In addition, millions of people around the world suffer from food insecurity and different forms of malnutrition because they cannot afford the cost of healthy diets. From a synthesized understanding of this knowledge, updates and additional analyses are generated to create a holistic view of the combined effects of these drivers, both on each other and on food systems, and how they negatively affect food security and nutrition around the world. In turn, the evidence informs an in-depth look at how to move from silo solutions to integrated food systems solutions. In this regard, the report proposes transformative pathways that specifically address the challenges posed by the major drivers, also highlighting the types of policy and investment portfolios required to transform food systems for food security, improved nutrition, and affordable healthy diets for all. The report observes that, while the pandemic has caused major setbacks, there is much to be learned from the vulnerabilities and inequalities it has laid bare. If taken to heart, these new insights and wisdom can help get the world back on track towards the goal of ending hunger, food insecurity, and malnutrition in all its forms.

Poverty and Shared Prosperity 2020 World Bank 2020-12-23 This edition of the biennial Poverty and Shared Prosperity report brings sobering news. The COVID-19 (coronavirus) pandemic and its associated economic crisis, compounded by the effects of armed conflict and climate change, are reversing hard-won gains in poverty reduction and shared prosperity. The fight to end poverty has suffered its worst setback

in decades after more than 20 years of progress. The goal of ending extreme poverty by 2030, already at risk before the pandemic, is now beyond reach in the absence of swift, significant, and sustained action, and the objective of advancing shared prosperity—raising the incomes of the poorest 40 percent in each country—will be much more difficult. Poverty and Shared Prosperity 2020: Reversals of Fortune presents new estimates of COVID-19's impacts on global poverty and shared prosperity. Harnessing fresh data from frontline surveys and economic simulations, it shows that pandemic-related job losses and deprivation worldwide are hitting already poor and vulnerable people hard, while also shifting the profile of global poverty to include millions of 'new poor.' Original analysis included in the report shows that the new poor are more urban, better educated, and less likely to work in agriculture than those living in extreme poverty before COVID-19. It also gives new estimates of the impact of conflict and climate change, and how they overlap. These results are important for targeting policies to safeguard lives and livelihoods. It shows how some countries are acting to reverse the crisis, protect those most vulnerable, and promote a resilient recovery. These findings call for urgent action. If the global response fails the world's poorest and most vulnerable people now, the losses they have experienced to date will be minimal compared with what lies ahead. Success over the long term will require much more than stopping COVID-19. As efforts to curb the disease and its economic fallout intensify, the interrupted development agenda in low- and middle-income countries must be put back on track. Recovering from today's reversals of fortune requires tackling the economic crisis unleashed by COVID-19 with a commitment proportional to the crisis itself. In doing so, countries can also plant the seeds for dealing with the long-term development challenges of promoting inclusive growth, capital accumulation, and risk prevention—particularly the risks of conflict and climate change.
